

# SUPERCARGE OPERATIONS

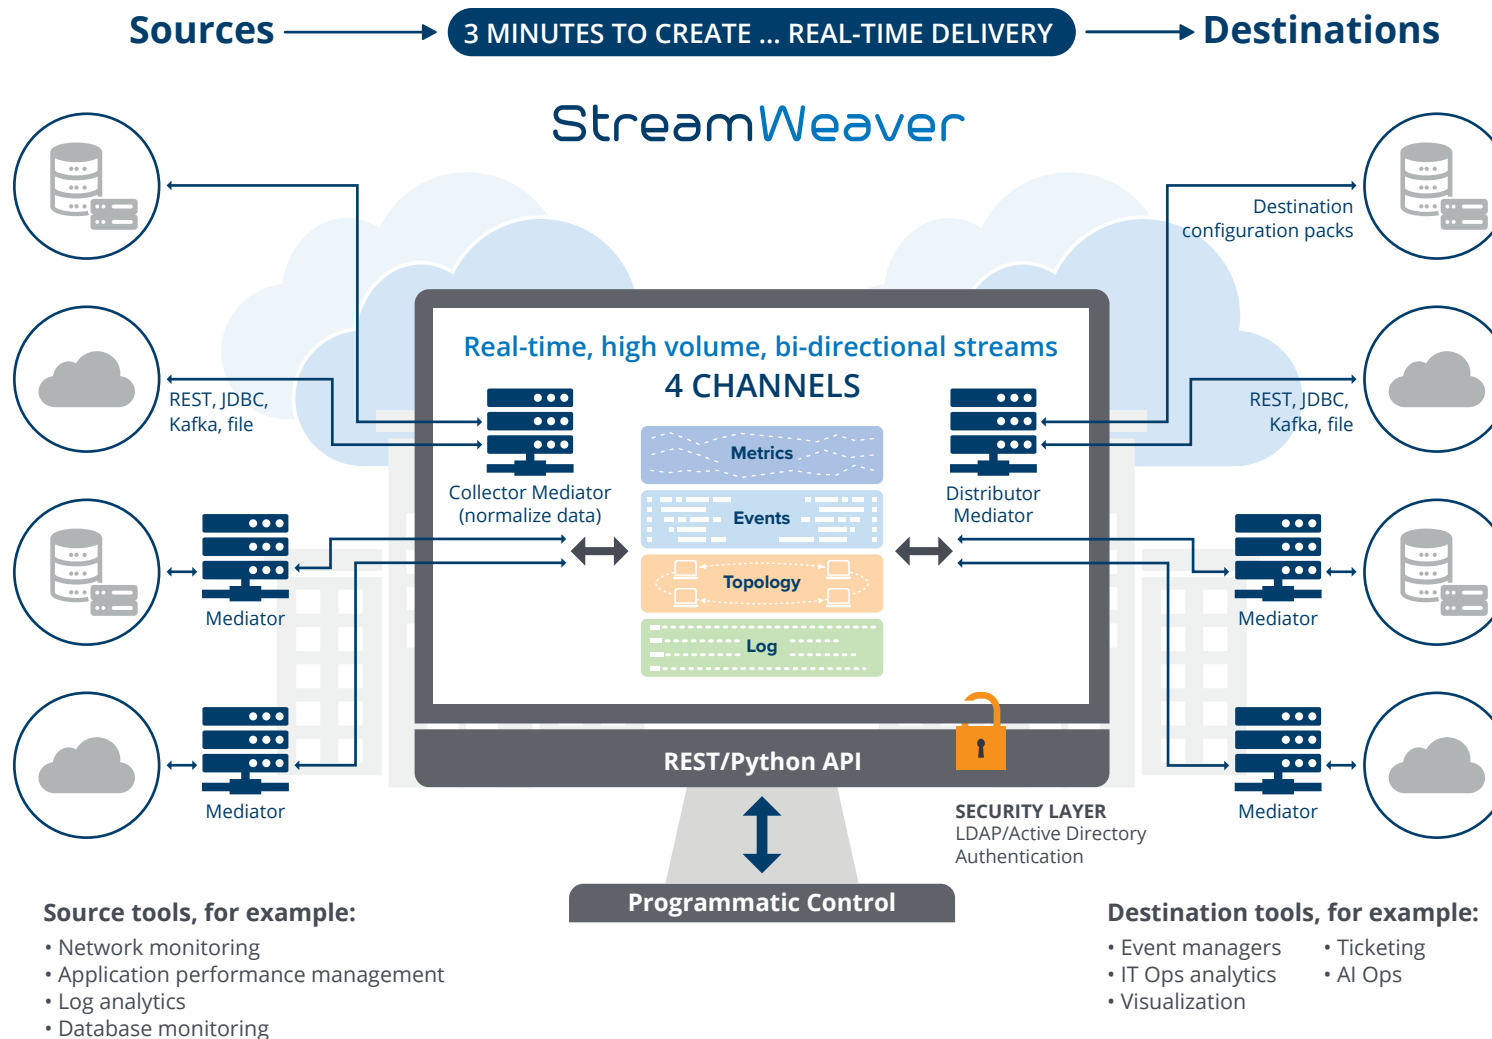

## Maximize the Value of your IT Ops Data

## Fast, Easy Automated Integrations

Whether you are deploying AIOps, advanced IT analytics, decision support, IT orchestration and automation, security operations, or visualization tools, getting the maximum value is directly related to the breadth and depth of available operations data.

Finally! ... you, your teams, and your tools have a simplified, easy way to access to all your enterprise-wide operations data—regardless of whether the data is cloud-resident or on-premise or a mixture of both. StreamWeaver efficiently feeds events, metrics, topology, and log data from third-party source tools into your destination tool(s) of choice.

Keep that data stream flowing with our **fault-tolerant, high-throughput, continuously available, horizontally scalable** enterprise architecture while avoiding the costs of building, and maintaining, brittle integrations.

# StreamWeaver

**INTEGRATE**  
in just 3 minutes  
**GET A DEMO**

INTEGRATE YOUR DESTINATION TOOL(S) OF CHOICE WITH 3RD-PARTY OPS DATA

## In Just 3 Minutes

StreamWeaver liberates your full stack operations data. With StreamWeaver, you can weave source data streams into your chosen destination, straight out-of-the-box. We can show you the start-to-finish integration in just 3 minutes.

**Click-and-connect capabilities** make this integration quick and easy and without need for costly application developers or consulting expertise. You can measure the time to integrate in minutes. The tools and applications below represent our out-of-the-box source and destination mediators available within the StreamWeaver Platform. If you don't see something you need, let us know. We are continually adding sources and destinations and may already be working on it.

### Current Destinations

Apache Kafka

BMC Remedy

CA Operational Intelligence

Cherwell

ElasticSearch

IBM Cloud Event Management

IBM Predictive Insights

Influx DB

Micro Focus OpsBridge Suite

QlikView Enterprise

ServiceNow

Splunk

VMware vCenter Operations

### Current Sources *(Additional Sources on Next Page)*

AWS CloudWatch

AppDynamics

Aternity

CA APM

CA UIM

Dynatrace AppMon

Dynatrace DC RUM

### DESTINATIONS Coming Soon

- Big Panda
- Lightbend
- Moogsoft
- OpsClarity
- Oracle Cloud Manager
- Pager Duty

*Coming destinations  
subject to change*

### SOURCES Coming Soon

- BMC Patrol
- CA Spectrum
- Check MK
- DataDog
- Docker
- GM Predix
- Google Cloud
- IBM Cloud
- Icinga
- Lightbend
- Micro Focus SiteScope
- Nagios
- Nutanix
- ServiceNow
- SumoLogic
- xMatters
- Zabbix

*Coming sources  
subject to change*

## Don't see a tool?

We'll have it ready  
by the time your  
PO arrives!

## StreamWeaver

StreamWeaver offers a systematic, automated approach to distributing valuable operations data, including event, metric, topology, and log information, from all domains and all clouds to the applications and teams best positioned to achieve desired business outcomes. Liberate data from application, network, storage, database, cloud and other siloed IT operations domains for use in AIOps, advanced IT analytics, decision support, and visualization tools via a simple, scalable, resilient, and easy-to-configure platform, reducing integration time from months to minutes. Headquartered in New York City, the StreamWeaver Platform is used by large ISVs including CA and IBM, and global enterprises including CVS, AT&T, EY and Humana. For more information, visit [www.streamweaver.com](http://www.streamweaver.com).
