SOLUTION BROCHURE

Micro Focus SMAX

Smarter Service Management for Everyone

Micro Focus SMAX

Micro Focus SMAX is comprehensive service management software that delivers efficient IT Service Management (ITSM), IT Asset Management (ITAM), and Enterprise Service Management (ESM). Powered by embedded analytics and machine learning, it is easy to use, easy to extend, and easy to run anywhere.

SMAX helps you get more done, your way. Choose from a range of out-of-the-box processes-including incident, problem, change, request, release, service catalog, servicelevel, and knowledge management—based on ITIL best practices. Shift from slow, error-prone manual tasks to Al-driven automation that enables high-speed service fulfillment and issue resolution. And replace complex, overcustomized deployments with easy-to-update alternatives that can run anywhere-saving you time, effort, and money.

SMAX—Driving greater productivity and faster issue resolution with Al-driven automation.

SMAX Customer Successes

Manage the Entire Service Lifecycle

Comprehensive Service Management

Cover all service phases, from plan to build to run. A modern user interface makes your work easy. You can automate processes, workflows, and tasks; resolve issues quickly; and respond to service requests efficiently. Built-in AI and machine learning make it possible.

IT benefit—

Business benefit—

Empowers agents to tackle and resolve more issues, faster delivering a better experience for all users. Improves productivity across the enterprise.

Modern Service Desk with Live Support and Collaboration

Create a more engaging service desk experience. Agents can interact with users over the phone, via chat, or using Live Support, a dedicated user interface optimized for service desk agents that offers real-time solutions. And users can crowdsource knowledge, proactively collaborating with their peers to get questions answered.

IT benefit—

Cuts average service desk call times by 20%.

Employee benefit—

Boosts user satisfaction by promoting self-help and decreasing downtime.

Elevate the User Experience

Self-Service and **Request Fulfillment**

Deliver enterprise-wide service and support from a fully integrated, intelligent, role-based self-service portal. Opening requests is easy. Users can use natural language, submit errormessage screenshots, or chat with virtual agents from their desks or mobile devices.

0 0 0 0

IT benefit-

Employee benefit-

Decreases incident volumes and scales support.

Meets expectations for easy, personalized, no-wait self-service.

Virtual Agent

Unburden your service-desk agents and boost user satisfaction with 24x7 self-service support. Now everyone can use natural language and their favorite mobile device to receive instant help from an intent-based conversational chatbot.

IT benefit—

Employee benefit—

Frees agents from repetitive tasks, improves support scalability, and cuts costs.

Offers anywhere, anytime self-help and faster problem resolution.

Smart Search

Get fast answers from global searches, thanks to Al and machine learning. Results come from multiple data sources—including incident, problem, and change management; knowledgemanagement databases; or Microsoft SharePoint. Users and agents can easily search using natural language rather than IT keyword search terms.

IT benefit-

Provides quick answers for incoming requests and issues.

Employee benefit-

Makes it easy for users to proactively find answers to their questions.

Smart Ticket and Smart Email

Allow users to open a ticket easily via email or by submitting the screenshot of an error message from their mobile device. Al and machine learning automatically analyze and categorize tickets for fast resolution. The system automatically learns from manual adjustments made by service desk agents.

IT benefit—

Allows users to work the Streamlines service processes, shortens ticket-handling times, and speeds up issue resolution. for them.

6

Employee benefit—

way that's most convenient

Inline Translation

Empower service portal users to open a request using their local language—for example, Chinese. The service desk agent can then open the ticket using the UI in another language—for example, English. The translation occurs automatically, inline and on-thefly, for both agent and user. Note: Google Translator is required.

IT benefit—

and accurately..

Makes it easy for agents and users to communicate clearly

Allows agents to deliver superior service with a single solution, unrestricted

Business benefit—

by language.

Increase Service Management Productivity

Intelligent Analytics

Manage services proactively and avoid recurring incidents by finding root causes with analytics based on AI and machine learning. By identifying patterns and trends in user surveys and service management data, you can continually improve your services.

IT benefit—

Business benefit—

Supports proactive problem solving and data-driven decisions. Reduces service disruptions and their associated costs.

Incident and Problem Management

Resolve issues faster with automatic ticket categorization, routing, and agent-to-agent chat. Based on AI, hot topic analytics helps you find root causes quickly and identify trends to proactively prevent future issues.

IT benefit—

Accelerates mean-time-torestore-services and drives continual service improvement.

Employee benefit-

Change and Release
Management

Control change risk with AI, machine learning, and automation. Execute changes and releases automatically. And use automated discovery to gain clear visibility into your IT assets, understand the impact of changes, and identify potential collisions. Equipped with this knowledge, you can facilitate compliance and avoid changes that introduce unintended risk.

IT benefit—

Allows IT to pivot with ease and keep the business running smoothly.

Business benefit—

Improves enterprise productivity by minimizing service disruptions.

Reporting and Dashboards

Choose from more than 100 out-of-the-box, ready-to-go IT service management performance and productivity reports-or build your own-to quickly create interactive, role-based, realtime dashboards.

IT benefit—

Business benefit—

Provides the insights needed to make informed, timely decisions. Provides the information needed to make better decisions, faster

Change Analytics

Gain insights based on accurate change management data, including suggestions for improvements. View graphical analyses of change management KPI performance—for example, change success rates and levels of automation. Customize your analysis with different criteria, such as service name, change, and time.

IT benefit—

Improves change success rates and reduces unplanned downtime.

Business benefit-

Minimizes the risk of unplanned service outages.

Knowledge Management

Create, maintain, share, and use knowledge to enable self-service support. Build knowledge based on roles—making it available to all users or limiting it to service desk personnel only.

IT benefit—

Offloads the burden of recurring incidents and requests from the service desk.

Employee benefit—

Gives users instant access to the information they need to get back to work.

Request Fulfillment

Manage service requests throughout their lifecycle—from the initial request to its closure. Fulfillment plans include task plans, which can include both manual and automatic tasks.

IT benefit—

Improves agent efficiency and productivity.

Employee benefit-

Gives users quick, easy access to standard services.

Service-Level Management

Track and measure how well your organization is meeting servicelevel targets and fulfilling agreed-on service levels. With clear and instant visibility into service performance, you can prioritize work queues, review response times, and reset your targets.

IT benefit—

Demonstrates value to users and business stakeholders.

Business benefit-

Aligns IT services with business needs.

Understand Service Context and Impact

Service Asset and **Configuration Management**

Get accurate, up-to-date configuration data and service context to support ITSM processes with native SACM. Collect, reconcile, and manage data for all configuration items-and understand all relationships—with automated discovery. Easily map inventory and infrastructure dependencies to business services for a realtime view of your hybrid environment.

IT benefit—

Business benefit-

Provides a single source of truth for robust planning and increased transparency.

Delivers reliable services and strengthens policy compliance.

Fast, Automatic CI Detection

Automatically recognize the assets-along with their configurations and interdependencies—that will be impacted by incoming changes, incidents, or service requests.

IT benefit—

Removes the need to hunt for the critical asset and configuration information required to resolve issues quickly.

Employee benefit-

Makes it easy to report issues without searching through confusing technical data.

IT and Software Asset Management

Manage investments, software licenses, contracts, and other assets for better decision making and cost reduction. Gain full visibility into your assets, from procurement through disposal. Keep track of software licenses to improve usage, decrease IT spending, and support compliance.

IT benefit—

Business benefit-Limits financial and

Optimizes resource usage and holds costs down

legal risk.

14

Simplify Service Management

Automated Processes, Workflows, and Tasks

Automate processes, workflows, and tasks using out-of-thebox best practices based on ITL. Easily remediate incidents and execute changes ranging from simple access requests to comprehensive workflows (such as detect-to-correct). Automate the fulfillment of IT services across environments-new and traditional, public and private cloud-to unify and accelerate service delivery.

IT benefit—

Business benefit-

Reduces risk and inefficiencies related to manual repetitive work. Drives down operational costs.

Runs Anywhere

Enjoy the flexibility of running your service management solution wherever you need to—on premises or in private or public clouds such as AWS, Microsoft Azure, Google Cloud, and SaaS. You can also choose the named, concurrent, or unit-based licensing option that works best for you.

IT benefit—

Business benefit-

Meets your evolving IT needs with flexible deployment and software licensing options.

Offers freedom of choice for easy alignment with corporate strategies.

Process and Workflow Design (Codeless Configuration)

Configure existing workflows and tasks or extend your service management solution and create new user-defined, processbased applications without writing any code. This will simplify the upgrade process and provide instant access to new features.

IT benefit—

Business benefit-

Removes the usual upgrade, customization, and maintenance complexities.

Allows the organization to quickly and economically adapt to changing service demands.

Manage Your Service Strategy

Idea and Proposal Management

Collect feedback from your service consumers to help generate and develop new service ideas. You can then turn these ideas into substantive proposals, build on them via social collaboration, and add them to your service management portfolio.

Application Portfolio Management

Gain a comprehensive overview of all your applications and determine which ones need to be modernized-for example, identifying which ones are suitable for the cloud.

IT benefit— Expedites continuous

service improvement.

Business benefit-

Drives and demonstrates innovation.

IT benefit—

Gives IT a clear way to assess and prioritize application optimization.

Business benefit-Serves as a solid

foundation for application transformation strategies.

Service Portfolio and **Catalog Management**

Manage your services and related investments throughout their entire lifecycle-from idea to service pipeline, service catalog, and service retirement.
