

ValueAccelerator-**WEB**

Whitlock Value Accelerator-WEB is a rapid time to value web monitoring and optimization bundle. VA-WEB includes everything necessary to deliver value: best practices, best-of-breed technology, and expert implementation.

Today's applications run on highly distributed infrastructure, all their components are in constant flux and are complex to monitor. Understanding the availability and performance of critical services and the customer experiences they represent is more important than ever. Always on and always responsive is the baseline expectation of customers and any deviation can erode customer satisfaction or in the worst case loss of customers.

Solution Highlights

FLEXIBLE OBSERVABILITY

Monitor Websites, APIs, Uptime, and Content with Splunk's Rigor suite of tools. Easy, web-based configuration does not require programming or scripting knowledge. Choose from many global locations to measure availability and performance from the perspective of end-users. Private locations can be configured for internal web assets.

BEST PRACTICES FOR OPTIMIZATION

Splunk's Rigor include hundreds of best practices and Google's Lighthouse Performance Scoring. Not only will defects and performance issues be identified, in most cases suggestions to remediate are provided. Tests can initiated from configurable mobile and desktop virtual devices.

DASHBOARDS AND REPORTING

OOTB Dashboards provide the basic views for Executive and Operations personas and custom dashboards can be created with a web-based, no programming required interface. Custom reports can be configured in a similar fashion.

ValueAccelerator–WEB

The Whitlock ValueAccelerator-WEB lets the experts handle all of the work needed to plan, implement, and support a next generation infrastructure monitoring system. It starts with a proven, project methodology, **WhitlockIS ValueFirst**, to ensure business goals and objectives are clearly defined and realized. Next, Whitlock's expert delivery team will deploy and configure the solution. Finally, **WhitlockIS TotalCare** will provide support and guidance to drive and expand ongoing solution value.

Four Easy Steps To Get Started

1

Contact **info@whitlockis.com** today to get started. It begins with a simple discovery call to understand your needs and provide an overview of relevant solution capabilities.

2

Participate in a **WhitlockIS ValueFirst** workshop to capture organizational goals/objectives, required capabilities, consumers, and expected value to ensure the investment aligns with business goals and outcomes are well understood – in business terms.

3

Whitlock's expert consultants will deliver the deployment and configuration of the solution according to the output from the workshop. Expect an as-built walkthrough and as-configured documentation when completed. The VA-WEB solution starts at 60k Browser Tests, 30k API Tests, and 60k Uptime Tests, but can scale to any size.

4

Enjoy the white glove treatment from **WhitlockIS TotalCare** to answer any questions, help out with further configuration, and act as the point of contact for any support issues that may arise.
